

Risk 1: Weak Continuing Airworthiness Control (AD/SB Compliance Slippage)

1. **Category:** Safety / Compliance
2. **Priority:** High
3. **Likelihood:** Medium
4. **Impact:** Potential non-compliance with continuing airworthiness requirements; grounding; safety exposure.
5. **Business Impact:** Flight cancellations, regulatory action, reputational damage, increased maintenance cost due to reactive fixes.
6. **Mitigation:**
 1. Central compliance calendar + escalations.
 2. Monthly CAMO–CAR145–Operator reconciliation.
 3. Evidence-grade export for audits (AD pack per aircraft).

Risk 2: Ineffective SMS Implementation (Paper SMS)

1. **Category:** Operational Safety
2. **Priority:** High
3. **Likelihood:** Medium
4. **Impact:** Hazards not identified/mitigated; weak risk management; regulator scrutiny.
5. **Business Impact:** Increased incident probability; insurance risk; audit findings; leadership accountability exposure.
6. **Mitigation:**
 1. Safety risk register with measurable controls and owners.
 2. Safety assurance audits + closure SLAs.
 3. Safety promotion + reporting feedback loop.

Risk 3: Maintenance Organisation Non-Conformance (CAR-145 Governance Weakness)

1. **Category:** Compliance / Quality
2. **Priority:** High
3. **Likelihood:** Low
4. **Impact:** Approval limitations/suspension; findings; operational disruption.
5. **Business Impact:** Loss of revenue, aircraft downtime, customer trust loss.
6. **Mitigation:**
 1. Periodic internal audits mapped to CAR-145 clauses.
 2. Competency tracking for certifying staff.

3. CAPA lifecycle automation with evidence attachments.

Risk 4: Parts Traceability & Supplier Risk (SUP Exposure)

1. **Category:** Supply Chain / Safety
2. **Priority:** High
3. **Likelihood:** Medium
4. **Impact:** Installation of unapproved parts; airworthiness compromise.
5. **Business Impact:** Grounding, legal exposure, heavy replacement costs, reputational loss.
6. **Mitigation:**
 1. Approved supplier registry + periodic validation.
 2. Receiving inspection + quarantine workflow.
 3. Traceability audits with sampling and penalties.
