

Incident 1: Consignment Note (LR) Issued With Missing Mandatory Fields / Wrong Declared Value

1. **Description:** Shipment booked and moved with LR/Consignment Note missing key fields (consignor/consignee details, nature of goods, weight, declared value, freight terms), or **declared value intentionally understated**.
 2. **Possible Damage:** Dispute on liability; claim rejection or partial settlement; penalties/litigation; loss of customer trust; audit non-compliance.
 3. **Risk Priority:** High
 4. **Status:** Assigned
 5. **Mitigation:**
 1. Digitally **gate dispatch** unless LR mandatory fields are complete (system validation).
 2. Enforce declared value rules + auto prompts for high-value categories (invoice upload mandatory).
 3. Random QA sampling of LR vs invoice vs actual goods; non-compliance penalties.
-

Incident 2: Delivery POD Not Captured / Tampered POD Uploaded After Delivery

1. **Description:** Proof of Delivery (POD) is missing, illegible, uploaded late, or tampered (wrong signature/date), especially in disputes for “not delivered / damaged delivery”.
 2. **Possible Damage:** Increased disputes and chargebacks; inability to prove delivery; customer escalation; legal exposure and revenue leakage.
 3. **Risk Priority:** High
 4. **Status:** In Progress
 5. **Mitigation:**
 1. Mandatory **real-time ePOD capture** (geo-tag + time-stamp + OTP/consignee signature).
 2. Block “Trip/Shipment closure” unless POD is attached (exception workflow with approvals).
 3. POD integrity checks (hashing + audit trail of edits/uploads).
-

Incident 3: Vehicle Operated Without Valid Fitness/Permit/Insurance Documentation at Dispatch

1. **Description:** Linehaul/last-mile vehicle dispatched with expired fitness certificate, permit, insurance, or driver credentials not validated at booking.

2. **Possible Damage:** Detention by authorities; penalties; delivery delays; accident liability and claim rejection; regulatory non-compliance findings.
 3. **Risk Priority:** High
 4. **Status:** Assigned
 5. **Mitigation:**
 1. Central document repository + expiry alerts + **hard stop** on vehicle assignment when expired.
 2. Driver onboarding verification (license validity, background check, training record).
 3. Periodic audit of fleet compliance and subcontractor document checks.
-

Incident 4: Damage/Loss Incident Not Logged Within SLA (Delayed Reporting)

1. **Description:** Consignment damaged/lost but incident is logged late (or not logged), missing evidence (photos, seal status, hub scan trail), and claims workflow starts after SLA.
2. **Possible Damage:** Claim disputes; insurer rejection; inability to identify root cause; repeat losses; financial leakage.
3. **Risk Priority:** Medium
4. **Status:** In Progress
5. **Mitigation:**
 1. Incident capture within SLA (e.g., 2 hours) with mandatory evidence attachments.
 2. Hub/route-level exception dashboards (damage/loss trend triggers).
 3. CAPA workflow linked to route, hub, vendor, and handler accountability.
