

Incident 1: Unauthorized Access Detected in HR Payroll System

1. Incident ID: INC-ISO-001
2. Description: Multiple failed login attempts were followed by a successful login into the HR payroll application from an unusual IP address outside business hours. Sensitive employee payroll records may have been viewed.
3. Possible Damage: Exposure of employee salary data, privacy breach, internal trust issues, regulatory concern.
4. Risk Priority: High
5. Status: In Progress
6. Affected Asset / System: HR Payroll Application
7. Business Function: Payroll Processing
8. CIA Impact: Confidentiality
9. Incident Owner: IT Security Manager
10. Root Cause:
11. Reported By:
12. Date and Time Detected: 2026-03-17 22:40
13. Escalation Required: Yes
14. Evidence Available:
15. Recovery ETA: 4 hours
16. Threat Source / Attack Vector: Credential compromise
17. Containment Action Taken: Account temporarily locked
18. Mitigation:
19. Disable affected account and force password reset.
20. Review access logs for lateral movement or unauthorized download.
21. Enable MFA for all payroll-related privileged accounts.

Incident 2: Malware Infection on Finance Team Endpoint

1. Incident ID: INC-ISO-002

2. Description: A finance department laptop executed a malicious attachment received through email, resulting in suspicious file encryption attempts and outbound network communication to an unknown domain.
3. Possible Damage: Endpoint compromise, possible ransomware spread, temporary unavailability of finance data, productivity loss.
4. Risk Priority: Critical
5. Status:
6. Affected Asset / System: Finance User Laptop
7. Business Function:
8. CIA Impact: Availability, Integrity
9. Incident Owner:
10. Root Cause: User opened suspicious attachment from phishing email.
11. Reported By: Endpoint Detection Tool
12. Date and Time Detected:
13. Threat Source / Attack Vector: Phishing email attachment
14. Evidence Available: EDR alert, suspicious hash value, email sample
15. Containment Action Taken:
16. Recovery ETA:
17. Severity Score: 9/10
18. Mitigation:
19. Full malware scan and forensic review of the endpoint.
20. Block sender domain and similar indicators across email gateway.
21. Restore any impacted files from latest clean backup if required.

Incident 3: Backup Failure for Customer Database

1. Incident ID:
2. Description: Scheduled backup for the customer master database failed for three consecutive days, but no escalation was triggered automatically.

3. Possible Damage: Data recovery gap, inability to restore latest state during outage, audit findings, extended downtime in case of failure.
4. Risk Priority: Medium
5. Status: Open
6. Affected Asset / System:
7. Business Function: Customer Management
8. CIA Impact:
9. Incident Owner: Database Administrator
10. Root Cause: Backup scheduler service instability suspected.
11. Reported By: Internal Audit Observation
12. Date and Time Detected: 2026-03-18 11:20
13. Escalation Required:
14. Evidence Available:
15. Backup Job Name: nightly_customer_db_backup
16. Last Successful Backup Date:
17. RTO Impact: High
18. Closure Date:
19. Mitigation:
20. Review backup scheduler logs and database agent service health.
21. Re-run backup manually and validate restoration success.
22. Configure alert escalation for repeated backup failures.
